

GEORGIA HERITAGE BANK

Be **MOBILE**.
But be **SAFE**.

Mobile Banking Safety Tips

-) **Lock your device!** This prevents unauthorized users.
-) **Do not store PIN and TAN numbers in your mobile device.** If your phone is lost and you have these numbers anywhere on your phone, your banking accounts will be accessible.
-) **Keep your mobile security software or antivirus for mobile updated.**
-) **Update your operating system and apps regularly.** Outdated apps are vulnerable to hacking attacks.
-) **Install apps only from trusted sources.** Apps from third party sites can bring malware.
-) **Deactivate Bluetooth and Internet sharing** when you do not need them.
-) **Verify WiFi networks before joining.** Cyber criminals often provide accessible WiFi networks to lure mobile internet users.
-) **Do not open random multi-media messages (MMS).** If you do not know the sender, it could contain a malware.
-) **Never use the automatic call acceptance feature.** Cyber criminals use this to instantly establish a connection to your device.
